

## **FUEL FILL ASSEMBLY AND METHOD OF FORMING SAME**

### **ABSTRACT**

5           There is disclosed a fuel fill assembly and a method of forming the  
same. The assembly typically includes a first component (e.g., an outer body  
panel) and a second component (e.g., a wheelhouse) of an article of  
manufacture such as an automotive vehicle. The assembly also typically  
include an annular member at least partially between the first and second  
10 components and a pair of seal for sealing between the annular member and  
the first and second components.
